CONTRACTOR REFERENCE
Dick Otke Construction - Gary Oberkrom
573-893-2299

Hawthorn Bank of Jefferson City acquired an existing 25,500 square foot office building with the vision to transform it into their new Operations Center and Trust Department. The building is ideally located directly across from Hawthorn's West Branch and is now the home to Human Resources, Loan Operations, Risk Management, Business Development and Trust Departments. The renovated space offers additional training rooms, office suites, employee work areas, vault storage, a generous break room, plentiful parking and an inviting lobby for patrons.

The existing size of the building not only accommodated the programmatic needs of each department but allowed for the creation of a community suite with a separate entrance. The large multipurpose room offers local organizations day time and after hours use and includes a catering kitchen and smaller conference room.
