

Boone Hospital Center Boone Appétit Cafe

Though small in actual square footage, the Boone Appétit Cafe project makes a significant impact along the highly visible main corridor of Boone Hospital Center. The Boone Appétit Cafe provides hospital and medical plaza visitors, as well as hospital staff, an opportunity to sit down and enjoy a cup of coffee or to grab a hot cup of soup.

The project challenge was to take the confined project area and create a spacious seating area while providing adequate space for food and beverage preparation and presentation. The project was further challenged with compressed design phases and an aggressive construction schedule. Additionally, the project required detailed coordination with hospital food service staff, food service vendors, food service designers, MEP engineers, hospital staff and contractors. As a result of the continual team communication and persistent coordination, another successful project was completed for Boone Hospital Center.

LOCATION
Columbia, Missouri

DESCRIPTION
1,700 sf renovation

COMPLETION DATE
November 2012

CONSTRUCTION COST
\$420 thousand

CLIENT REFERENCE
Katlyn Hays, BHC Project Engineer - 573-815-3325

CONTRACTOR REFERENCE
McAfee Construction, John McAfee - 573-474-4397

DESIGN SERVICES PROVIDED
Schematic Design, Design Development, Construction Documents, Bidding/Negotiation, Construction Administration, Interior Design
