

# Special Olympics Missouri North Outdoor Facilities

Special Olympics "North Outdoor Facilities" is the second and final phase in the completion of Special Olympics Missouri's Training for Life Campus. While the first phase encompassed the headquarters building, parking and main playing fields, the North Facilities phase included fields or courts for the following sports: bocce ball, tennis, shot-put, horse shoe, softball and golf skills. In addition, the scope of work involved an outdoor pavilion to house restrooms, a picnic area, garage storage, and the Law Enforcement Torch Run Plaza.

During the design of the first phase, the North Outdoor Facilities were located in a master plan, but the client opted to defer creation of construction documents for the North Facilities until certain fundraising targets were achieved. This master plan approach enabled the second phase to go smoothly. Underground utilities were designed to be easily expanded and appropriate space for each facility had already been allocated and arranged, so design decisions were minimal. The second phase simply documented in detail what had already been thought through.

In addition to the renderings SOA created for the first phase, SOA generated new renderings highlighting the North Facilities and created a detailed cost estimate for each North Outdoor Facility feature to aid in fundraising for those amenities.

## LOCATION

Jefferson City, Missouri

## DESCRIPTION

3 acres of playing fields and a 2,300 sf outdoor pavilion

## COMPLETION DATE

Construction pending completion of fundraising

## CLIENT REFERENCE

Mark Musso, President & CEO  
573-635-1660

## CONTRACTOR REFERENCE

Reinhardt Construction - Brian Neuring  
314-645-9595

*"[SOA's] digital model truly enabled our board and staff to better understand and take ownership of the project. SOA helped us grow excitement from staff to donors about SOMO's future home and our ability to serve so many Missouri Athletes!"*
