Hope Center is a partnership that seeks to successfully transition persons who have been residing at Fulton State Hospital and have barriers to reintegration in the community. It is approximately an 18-month program assisting the individual to develop a personal plan and develop a support system to transition back into the community.

The Hope Center's facility is a 8,500 square foot, 16-Bed Residential Facility building located in Mexico, MO. It includes offices for staff members, a conference room, a common dining and living room as well as a kitchen for residents to prepare their own meals. The interior has a comfortable and warm atmosphere that includes a stone fireplace and a feature wall made from 3-Form acrylic panels backlit by LED lighting in the common areas.

Energy saving features include ground source heating and cooling, and LED interior and exterior lighting.
